## INSURANCE

The insurance companies that we have worked with the last few years have discontinued "loss of use" coverage.

With the reality that sometimes young bulls become injured during their first breeding season, we have worked to come up with a fair and reasonable way to share the risk with our bull customers. With customers that wanted the "loss of use" insurance we shared one-half the premium cost for coverage on the bulls to lower your risk. We have decided to continue sharing one-half the risk during this transitional period with the breeding guarantee described below.

Mortality insurance will still be available. An insurance representative will be here on sale day to help you with your insurance needs.

## FIRST YEAR BREEDING GUARANTEE

All bulls selling for \$2000 or more will be covered 50% by Stevenson Basin if they are injured during their first breeding season and not able to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Stevenson Basin and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2008.

*Example 1:* A \$5,000 bull is injured, a credit of \$2,500 minus one-half any salvage value will be given to the buyer.

*Example 2:* A \$2,000 bull is injured, a credit of \$1,000 minus one-half of any salvage value will be given to the buyer.

*Example 3:* A \$1,750 bull is injured, no credit is given. Buyer retains all salvage value.

## How to Read the Information Printed with Each Sale Lot

Complete performance information is provided for each animal. The ratios are calculated in separate contemporary groups by ranch and conditions they were raised under, so that a ratio of 100 will not necessarily correlate to the same weight between the different groups. We have calculated interim EPDs for cattle that do not yet have official EPDs. Expected Progeny Difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. An EPD is expressed in pounds, either plus or minus. For example, when used on the same cows, calves sired by a bull with a +40 weaning EPD should average 10 pounds more than those sired by a bull with a +30 weaning EPD.

### Birth (BW) EPD

is a predictor of progeny birth weight attributed to the parent.

### Weaning (WW) and Yearling (YW) EPDS

are predictors of the animal's ability to transmit weaning growth and yearling growth to its progeny.

**Milk EPD** is a predictor of an animal's genetic merit for milk and mothering ability.

### Calving Ease Rating (CE)

- ★★★★ Excellent calving ease, use with confidence on any type of heifers.
- ★★★ Superior calving ease, should work with most heifers and most situations.
- ★★ Moderate calving ease, most people will use these bulls on cows, but they can be used on heifers if calving ease is of less concern.
- ★ We recommend these bulls just for use on cows.

**Birth Weight** (actual).

**205 and 365 Weight** are weaning and yearling weights adjusted to 205 and 365 days allowing comparison of individuals.

**Weaning Ratio and Yearling Ratio** as computed for use in within-herd comparisons. Animals produced by embryo transplant will have an "ET" in place of a ratio.

**Dam Production** is the number of calves and average nursing ratio for all calves raised by the dam of the animal, the average cow being 100.

### \$B (Beef Value)

An index value expressed in dollars per head, the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

### EPDs for Carcass Merit based on the Ultrasound Evaluation System

#### IMF EPD

Intramuscular Fat (IMF) is a predictor of the difference in a sire's progeny for percent intramuscular fat or marbling in the ribeye muscle compared to progeny of other sires.

#### URE EPD

Ultrasound Ribeye Area (URE) is a predictor of the differences in square inches of ribeye area of a sire's progeny, compared to the progeny of other sires.

# BULL DELIVERY

## FREE BULL DELIVERY TO CENTRAL POINTS.

STEVENSON BASIN will coordinate free delivery of your bull purchases to central points in the continental United States. The central points for delivery will include auction barns, vet clinics and ranches selected to serve as a delivery point.

STEVENSON BASIN would like to deliver all of the bulls personally, however because of the volume we handle we find it necessary to employ reputable trucking firms to assist us in the process. Our goal with the current delivery policy is to limit the amount of unnecessary extra time that the bulls spend on the trailer in transit to your ranch and to keep the cost of delivery reasonable enough that we can continue our free delivery policy.

By sale time we will have compiled a list of suggested central points. At the time of settlement we will ask you to select the central points that you prefer for delivery. For our customers that purchase groups of ten head or more, we will deliver to the buyer's ranch at no charge.

We simply ask for your cooperation in arranging the delivery of your bulls. This will keep the bulls from being on the truck too long and therefore get your bulls to you in the best condition possible.

## Let Us Know . . .

In the interest of better serving you, our customers, we are making every effort to better expose Stevenson Basin genetics. We are constantly networking with many order buyers and feedlots, the next level of our segmented industry. Through a more collaborative working effort, between ourselves (the seedstock provider), yourself (the commercial producer) and the feeding sector; we can eventually close the gap and meet the demand for a more consistent and high quality product, our most rudimentary obligation.

With this in mind, the ORigen Partnership has moved into its next venture by aligning with the world's largest cattle feeding company, Five Rivers Cattle Feeding LLC, and National Beef, the industry's most quality-focused packing company. Through these alliances, the ORigen partners and ultimately Stevenson Basin with its customers will be on the forefront of forthcoming issues of animal identification, source verification and eventual supplementation of the highest valued branded beef programs both domestically and internationally.

**Let us know** when you get ready to market your calves. Whether you sell them in the country, through a barn or on the video, let us know. We can assist in your marketing needs and give you some added market exposure. Many feeders, including Five Rivers, are looking to Stevenson Basin for superior genetics.

## Don't let 'em leave home without one!

If you have calves to market, don't let them leave home without an AngusSource® tag. AngusSource adds value to your Angus-sired feeder cattle and replacement heifers by:

- Guaranteeing Angus genetics
- Verifying source and age
- Opportunity to qualify for Certified Angus Beef® regardless of hide color.

## THE PEOPLE BEHIND STEVENSON BASIN

---

**Stevenson Angus Ranch** is owned and operated by Keith and Roberta Stevenson and their four sons. Darrell and his wife Sara are home working on the ranch and have two children — Craig and Claire. Bob and his wife Robin are also home working on the ranch. Mike has chosen a career in Bozeman, MT and Jake has recently returned to the ranch.

**Basin Angus Ranch** is owned and operated by Doug and Sharon Stevenson and Valerie and Clint Carr, along with Doug and Valerie's mother, Marian Stevenson. Doug and Sharon have three children — Brittany, Leisa and Nicole. Valerie and Clint also have three children — Kyle is serving in the military, recently finishing his second tour in Iraq, Loni graduated from Montana State University and works in Bozeman and Nathan is attending MSU-Billings College of Technology.

**Stevenson's Diamond Dot** is owned and operated by Clint and Adana Stevenson, along with Clint's mother, Marian Stevenson. Clint and Adana have five children — Wayne, Faith, Abigail, Rachael and Carson.

**Stevenson Basin** is the jointly owned entity through which we market the genetics of our three operations. Along with the Stevenson family members, the following people work for **Stevenson Basin** and are available to assist you with your purchases of **Stevenson Basin** genetics.

*Tom Hardesty* worked at Basin Angus for several years. Tom now lives in Arizona and represents us in the southwestern states.

*Lance Hughes, DVM*, is our veterinarian. In addition to planning our herd health program, Lance is very knowledgeable about our cattle.

*Ryan Hughes* was born and raised on a progressive commercial cow/calf outfit right here in the Judith Basin. With the title of Customer Service Representative, Ryan is available to help customers with their cattle selections.

*Shane Whiteman* has the title of Customer Service Representative and Marketing Specialist at Stevenson Basin. Prior to coming to Basin Angus, Shane was a herdsman or manager with several progressive purebred operations. Shane spends much of his time helping customers select cattle from our program and helping customers plan marketing programs.

**Stevenson Basin** also includes three cow herd locations outside of Montana.

**Nebraska Unit** - A&K Farms, Bertrand, NE is owned by Abe, Kaleb and Leroy Kuck, longtime friends of the Stevenson family.

**Missouri Unit** - Hopewell Farms, Paris, Missouri is owned by Bob and Lynn Fodge. Along with their own cows, Bob and Lynn also run a group of Basin Angus cows, including most of our fall calving herd.

**Oklahoma Unit** - Okie Angus, Yale, Oklahoma is owned by Darin and Cassandra Griffin. Originally from Oklahoma, Darin interned and worked at Stevenson Angus before moving back to start his own herd.

# BRED ANGUS HEIFERS

## C A RANCH

Page Anderson – 406.285.4548 or 406.580.0487 cell

The CA Ranch is a family owned and operated cow-calf operation with headquarters at Three Forks, Montana. The ranch runs approximately 2000 mother cows in Gallatin, Madison, and Meagher counties. Buck and Marcia Anderson purchased the ranch in 1959. It is currently managed by the next generation: Page, Frank, Kathy and Anita. Cattle are the primary business, although the ranch also runs a guided hunting camp for elk and deer.

The heifers offered in this sale are the result of a program which has focused on developing moderate framed, functional cows that can thrive in a low input, low labor operation. Cows are expected to winter on pasture, calve on their own and breed back while bringing in a superior calf. They have been handled on foot and on horseback. CA practices a strict culling program. Bad feet, udders, disposition, or mothering ability are culled without exception. Careful selection, combined with 17 years of an intensive AI program make this a superior offering of heifers backed by Stevenson Basin genetics.

# 13 - 24 MONTH OLD BLACK ANGUS BULLS

---

We have been developing and expanding our Fall Calving herd in order to provide more of these Older Age Bulls for this spring sale each year.

From weaning through a year of age, most of these bulls were on test at Hopewell Farms, Paris, MO, where they were fed a high roughage growing ration. These bulls were moved to Montana in January and have continued to receive a high roughage feed. The rest of these bulls were fed here at Hobson from weaning on.

Complete performance information is provided for each bull. An explanation of the performance information is printed on page 3. These bulls are ratioed in different contemporary groups by ranch and by the conditions under which they were raised, so a ratio of 100 will not necessarily correlate to the same weight between the different groups.

These bulls are guaranteed breeders and have all passed a breeding soundness exam including a semen test. Scrotal measurements will be available sale day.

**RETAINED INTEREST** - We are selling **FULL POSSESSION** and **1/2 REVENUE-SHARING SEMEN INTEREST** in every bull in this sale. The bull you purchase is totally in your control regarding how you handle the bull and your natural service use. You receive 100% of the salvage value. Retaining a 1/2 revenue-sharing semen interest simply allows Stevenson Basin the right to share in collection of semen, use of semen from the bull in our herds and the right to share in semen sale revenue if semen sales become a possibility on the bull.

Realistically, we will collect semen on only a small percentage of the bulls selling. It will be an even smaller number of bulls that will develop a market for semen sales. However, we are retaining an interest in every bull because we might identify the next great bull after he has sold, often later in life, after he has proven himself in the breeding pasture. If you have any questions or concerns about our retained interest policy, please talk to any of us listed as representatives on page 1 of this catalog for further explanation.

# RED ANGUS BULLS

The Yearling Red Angus Bulls include bull calves born at Stevenson Basin and Double Tree Red Angus. These bulls were raised from birth to weaning with no creep feed. From weaning until now the bulls have been fed a high roughage growing ration.

Providing outcross genetics to the Red Angus breed is the primary focus at Stevenson Basin. While we do use some of the popular red sires, we are always trying to include new bloodlines from our Angus program. We have used many prominent Angus sires in our Red Angus herd including CA Future Direction, Gardens Sensation 039 S1, GDAR Rainmaker 340, GT Maximum, N Bar Emulation EXT and Rockn D Ambush 1531.

Weaning weights were taken from September through early October and yearling weights were taken the last week of January. Complete performance information is provided for each bull. An explanation of the performance information is printed on page 3. These bulls are ratioed in different contemporary groups by ranch and by the conditions they were raised under, so a ratio of 100 will not necessarily correlate to the same weight between the different groups.

These bulls are guaranteed breeders and have all passed a breeding soundness exam including a semen test. Scrotal measurements will be available sale day.

**RETAINED INTEREST** – We are selling **FULL POSSESSION** and **1/2 REVENUE-SHARING SEMEN INTEREST** in every bull in this sale. The bull you purchase is totally in your control regarding how you handle the bull and your natural service use. You receive 100% of the salvage value. Retaining a 1/2 revenue-sharing semen interest simply allows Stevenson / Basin the right to share in collection of semen, use of semen from the bull in our herds and the right to share in semen sale revenue if semen sales become a possibility on the bull.

Realistically, we will collect semen on only a small percentage of the bulls selling. It will be an even smaller number of bulls that will develop a market for semen sales. However, we are retaining an interest in every bull because we might identify the next great bull after he has sold, often later in life, after he has proven himself in the breeding pasture. If you have any questions or concerns about our retained interest policy, please talk to any of us listed as representatives on page 1 of this catalog for further explanation.

# YEARLING BLACK ANGUS BULLS

---

These Yearling Angus Bulls represent our most progressive genetics born in 2007. This offering is comprised of the January and February bull calves out of our first calf females, select ET bulls saved for this sale, and bulls raised from cows outside of the headquarter ranches near Hobson. Bulls born after March 1<sup>st</sup> are saved to be developed and sold as two-year olds.

These calves were raised from birth to weaning with no creep feed. After weaning, the calves are fed a high roughage growing ratio.

Weaning weights were taken in early September and yearling weights were taken the last week of January. Complete performance information is provided for each bull. An explanation of the performance information is printed on page 3. The ultrasound EPD's listed in the catalog are the current EPD's after scanning. These bulls are ratioed in different contemporary groups by ranch and by the conditions they were raised under, so a ratio of 100 will not necessarily correlate to the same weight between the different groups.

These bulls are guaranteed breeders and have all passed a breeding soundness exam including a semen test. Scrotal measurements will be available sale day.

**RETAINED INTEREST** – We are selling FULL POSSESSION and 1/2 REVENUE-SHARING SEMEN INTEREST in every bull in this sale. The bull you purchase is totally in your control regarding how you handle the bull and your natural service use. You receive 100% of the salvage value. Retaining a 1/2 revenue-sharing semen interest simply allows Stevenson / Basin the right to share in collection of semen, use of semen from the bull in our herds and the right to share in semen sale revenue if semen sales become a possibility on the bull.

Realistically, we will collect semen on only a small percentage of the bulls selling. It will be an even smaller number of bulls that will develop a market for semen sales. However, we are retaining an interest in every bull because we might identify the next great bull after he has sold, often later in life, after he has proven himself in the breeding pasture. If you have any questions or concerns about our retained interest policy, please talk to any of us listed as representatives on page 1 of this catalog for further explanation.

The pick of MONEYMAKER's first calf crop, LOT 501 has been a favorite since branding. A contemporary leader for all traits, he ranks in the top 2% for both WW and YW EPDs, top 2% for \$W, top 3% for \$F and top 15% for MILK EPD. He recorded 118 IMF and 108 URE to rank in the top 20% for both traits as well as top 10% for \$B. His cow family, one of our best, produced ROYCE 741C (Alta Genetics), NUGGET 801X (ABS), MAXIMUM 801A (Accelerated Genetics), FORTUNE 801D (Semex Las Lilas) and ROLLING THUNDER. His dam was a first calf heifer and his second dam records 3 NR 105, 2 YR 101, 29 IMF 101 and 29 URE 102. Third dam records 6 NR 102, 6 YR 107, 6 IMF 101 and 6 URE 108. His \$810,000 valued sire is one of the hottest bulls in the industry, expect LOT 501 to capture much interest and even exceed his sire's demand with added carcass and superior maternal tabulation.

**"I do solemnly swear, as shepherd of the flock, to accept the responsibility for the animals put in my care. To tend to their basic needs of food and shelter. To minister to their ailments. To put their well-being before my own, if need be, and to relieve their pain and suffering up to, and including, the final bullet.**

*I swear to treat them with respect. To always remember that we have made them dependent upon us and therefore have put their lives in our hands.*
