

# **PAP TESTED BULLS**

## **DEVELOPED AND TESTED FOR HIGH ALTITUDE**

---

This set of bulls are in Laramie, WY and will not walk through the sale ring on sale day. They will sell in sale book order and you can bid in our sale barn in Hobson, bid on the phone or the internet at [www.NorthernLivestockVideo.com](http://www.NorthernLivestockVideo.com)

In order to better service our High Altitude customer base, we have committed to a full PAP testing program with groups of bulls being managed at 7250'. For several years, we have tried to accommodate this procedure, but were simply limited with our home ranches being located at 4500'. Instead of testing sporadic samples in limited numbers, we felt that we needed to test larger groups of bulls – more bulls and more sire groups.

Under the guidance of Dr. Tim Holt, this set of bulls was pre-screened with an initial PAP test in Hobson, MT at 4500' in July. There were no selection criteria for bull kind, type or pedigree. The bulls were pulled from our fall sale offering and spring private treaty sale bulls. Our goal was to send 110 bulls to Laramie, WY and be summered at 7250'. We selected the bulls for the final test simply from PAP scores.

Upon selection, the 110 bulls were sent to Laramie and summered at the Thorbardin Ranch on a maintenance roughage ration. After six weeks in Laramie at 7250', a final PAP was conducted by Dr. Tim Holt. The final results are printed throughout the following pages.

We were very pleased with this test and felt the pre-screen in Hobson eliminated many of the high risk suspects. The final test in Laramie sorted another handful of moderate risk bulls. We are fully confident in the remaining selection and stand behind them 100%.

These bulls were raised within the same conditions and contemporaries as every other bull in the offering. They have all passed a breeding soundness evaluation including a semen test. All bulls offered have been tested BVD-PI negative.

These bulls have not been pushed and are still on a maintenance only roughage ration. They are not clipped, primped or pampered for this sale.

The bulls are available for your viewing at any time at the Thorbardin Ranch at Laramie, WY. We'd like to extend our sincerest appreciation to Cody and Katie Talbott and the rest of the crew at the Thorbardin Ranch. As you will see, the bulls have been well cared for and we are excited to be working with such an enthusiastic group.

The Thorbardin Ranch is located west of Laramie, WY 14 miles on I80, Exit 297. Turn east on Herrick Lane 1.2 miles, turn left onto Sprague Lane, next right take Carroll lake Road 3.5 miles to the ranch. If you have any questions or would like to inspect the bulls contact Cody Talbott 307-760-5914.

Remember that you can preview the entire offering, including the PAP tested bulls on [www.NorthernLivestockVideo.com](http://www.NorthernLivestockVideo.com) or call for a free DVD.

**RETAINED INTEREST** – we are selling **FULL POSSESSION** and **½ REVENUE-SHARING INTEREST** in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining ½ revenue-sharing semen interest simply allows Stevenson Genetics the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact any Stevenson Genetics representative.
